AGROBAR SERIES

AgroBar Ultra 320

Designed specifically for multi-level cultivation operation

VEGETATIVE SPECTRUM, ULTRA HIGH EFFICIENCY

AgroBar Ultra 320 uses the AgroUltra V, an ultra high efficiency vegetative spectrum to promote exceptional growth. Our proprietary design is able to achieve up to 2.96 $\mu\text{mol/J}$ efficacy, the highest in the industry.

UNIFORMED LIGHT DISTRIBUTION, FLEXIBLE DESIGN

The ultra wide AgroBar allows for uniformed light distribution over the entire grow area while effectively managing heat dissipation. Our flexible design allows complete coverage 4'x4', 2'x8', or two 2'x4' areas using a single fixture. The ABU 320 is perfect for vegetative plants, mothers, and clones.

Specifications recorded at controlled environment with 240V power supply. Result may vary based on available power voltage.
